ADCP Bowling

Bowling tournament manager - 2022

- **Code and user manual:** github.com/Alejoprin/ADCPBowling
- **Deployment**: alejoprin.github.io/ADCPBowling/control.html

WORK EXPERIENCE

Iskender's Exchange - (2018-Currently)

Project Leader

Remittance sending from and to Venezuela, from different Latin American countries. In charge of all logistics starting from receipt until delivery of the remittance to the beneficiary, social media marketing, and customer service.

Coraltop / Dominican Republic - (2014-2015)

Project Manager

I was assigned this project by Granitop with the aim of creating from scratch the infrastructure necessary to produce a version of Spaccato with Dominican coralina. My main task was to manage physical, financial, and human resources and their allocation to tasks, manage deadlines to complete said tasks, negotiate with suppliers, and make decisions to solve problems and changes that the project demanded on the go.

It was an excellent experience, I learned a lot of things in different areas, it made me want to embark on personal projects.

Granitop - (2012-2014)

Production supervisor | Sales

- My main tasks were:
- Check production according to specifications.
- Send reports on performance and progress.
- Identify efficiency problems and suggest improvements.
- Apply company regulations and safety guidelines strictly.
- Ensure safe use of equipment and schedule periodic maintenance tasks.
- Organize workflow by assigning responsibilities and preparing programs.
- Supervise and coordinate employees

Achievements:
- Total sale of a large amount of production (marble) that was stored as waste in a Granitop warehouse for years, achieving maximum use of raw material.
- Development of a system for generating delivery notes, which I did with Visual Basic 6.0, Crystal Reports, and Microsoft Access.
